

# SyntheticFeedback

FEEDBACK This class generates synthetic feedback

## Class Details

Superclasses	<a href="#">handle</a>
Sealed	false
Construct on load	false

## Constructor Summary

<a href="#">SyntheticFeedback</a>	
-----------------------------------	--

## Property Summary

<a href="#">coactive</a>	
<a href="#">ordinal</a>	
<a href="#">preference</a>	

## Method Summary

	<a href="#">addlistener</a>	Add listener for event.
	<a href="#">delete</a>	Delete a handle object.
	<a href="#">eq</a>	== (EQ) Test handle equality.
	<a href="#">findobj</a>	Find objects matching specified conditions.
	<a href="#">findprop</a>	Find property of MATLAB handle object.
	<a href="#">ge</a>	&gt;= (GE) Greater than or equal relation for handles.
	<a href="#">getSyntheticFeedback</a>	Generates automatic synthetic feedback based on predefined objective
	<a href="#">gt</a>	&gt; (GT) Greater than relation for handles.
Sealed	<a href="#">isvalid</a>	Test handle validity.
	<a href="#">le</a>	&lt;= (LE) Less than or equal relation for handles.
	<a href="#">listener</a>	Add listener for event without binding the listener to the source object.
	<a href="#">lt</a>	&lt; (LT) Less than relation for handles.
	<a href="#">ne</a>	~= (NE) Not equal relation for handles.
	<a href="#">notify</a>	Notify listeners of event.
Static	<a href="#">printActionInformation</a>	

## Event Summary

<a href="#">ObjectBeingDestroyed</a>	Notifies listeners that a particular object has been destroyed.
--------------------------------------	---
